### UTILISATION

To be fed wet for horses that live in the pasture or that eat quickly.

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

Our recommendations:

- Distribute a minimum of 1.2 kg of hay per 100 kg of live weight for horses on straw bedding and 1.5 kg per 100 kg live weight for horses on shredded bedding.
- Leave a self-service salt stone and water at your disposal clean at will
- Ideally, divide the ration into at least 3 balanced meals

### BALANCING THE INTESTINAL FLORA

Fructo-oligosaccharides and inuline stimulate the beneficial bacteria in the intestine and suppress those bacteria that are potentially harmful.

OPTIMAL FUNCTIONING OF THE DIGESTION

### REGAINING APPETITE

Digestive problems can cause a loss of appetite. The active ingredients in GASTRI Fiber help to stimulate the appetite.

## PROTECTS THE LINING OF STOMACH AND INTESTINES

A combination of specific ingredients acts as a digestive support.
