USE

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

Our recommendations:

- Distribute a minimum of 1.2 kg of hay per 100 kg of live weight for horses on straw bedding and 1.5 kg per 100 kg live weight for horses on shredded bedding.

- Leave a self-service salt stone and water at your disposal clean at will.

- Ideally, divide the ration into at least 3 balanced meals.
