ENERGY FIBER

DENSITY 1L = 500 G

WORK INTENSITY	DAILY DISTRIBUTION
LIGHT	From 1,5 to 3 kg
MEDIUM	From 2,5 to 4 kg

UTILISATION

For gluttonous horses with a tendency to eat very quickly, it's best to feed wet.

Energy Fiber is used as a supplement to forage. We advise to feed at least 1.2 kg hay per 100 kg of the horse's body weight. For a 500 kg horse, this means a daily distribution of 6 kg of hay.

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.
