USE

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

Our recommendations :

- Distribute at least 1.2 kg of hay per 100 kg of body weight for horses on straw bedding and 1.5 kg per 100 kg of body weight for horses on shavings.

- Leave a salt stone available for free use and clean water at will.

- Ideally, divide the ration into at least 3 balanced meals.
