

GASTRIC AND DIGESTIVE SENSITIVITY

In what situation should this feed be used?

- For horses with low energy requirements

Loss of appetite, yawning, dull coat, soft dung, leg defences, reaction to girth, recurrent colic, difficulty gaining weight, teeth grinding...

- In the post-operative period, during and after a medicinal treatment, antiinflammatory or antibiotic treatment

HORSES WITH LOW ENERGY REQUIREMENTS AND AT RISK OF GASTRIC ULCERS

Grain free

No added sugar

GASTRI FIBER

DENSITY 1L = 520 G

GASTRIC SENSITIVITY	DAILY DISTRIBUTION
Moderate gastric sensitivity	At least 1 to 2 kg or 2 to 4 liters per day Divided between all meals.
Strong gastric sensitivity	Full ration

Supplement to forage for horses

COMPOSITION

Wheat bran, Alfalfa high temperature dried, Dried apple pomace, Lucerne pomace, Dried beet pulp, Clays, Rape seed oil, Linseed extruded, Dried chicory pulp, Pea flakes, Fructo oligosaccharides, Dicalcium Phosphate, Salt, Carrot dried, Chicory roots, Wheat germ.

TECHNICAL CHARACTERISTICS PER GROSS KG

Calcium
Phosphorus
Magnesium
Potassium
Digestible Nitrogen
Omega 3
Omega 6

AMINO ACIDS PER GROSS KG

Lysine
Methionine + cystine
Methionine
Threonine
Tryptophan
Leucine
Arginine
Isoleucine
Valine
Phenylalanine

LITH ISATION

For gluttonous horses with a tendency to eat very quickly, it's best to feed wet.

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

Our recommendations:

- Distribute a minimum of 1.2 kg of hay per 100 kg of live weight for horses on straw bedding and 1.5 kg per 100 kg live weight for horses on shredded bedding.
- Leave a self-service salt stone and water at your disposal clean at will.
- Ideally, divide the ration into at least 3 balanced meals

ANALYSED CONSTITUENTS

Crude protein
Crude cellulose
Crude fats
Ash
Sodium
Starch
Sugars

VITAMINS AND TRACE ELEMENTS PER GROSS KG

Vitamin A
Vitamin D3
Vitamin E
Vitamin B1
Vitamin B2
Vitamin B6 8 mg
Vitamin B12 0,03 mg
Vitamin PP
Vitamin C
Vitamin K3 0,9 mg
Pantothenic acid 6,6 mg
Folic acid
Choline chloride
Biotine
Iron
Copper
Zinc
Manganese
lodine
Cobalt
Selenium total

BALANCING THE INTESTINAL FLORA

Fructo-oligosaccharides and inuline stimulate the beneficial bacteria in the intestine and suppress those bacteria that are potentially harmful.

OPTIMAL FUNCTIONING OF THE DIGESTION

REGAINING APPETITE

Digestive problems can cause a loss of appetite. The active ingredients in GASTRI Fiber help to stimulate the appetite.

PROTECTS THE LINING OF STOMACH AND INTESTINES

A combination of specific ingredients acts as a digestive support.
