WORK INTENSITY	DAILY DISTRIBUTION
Light	From 1,5 kg to 3 kg
Medium	From 2,5 kg to 4 kg
Intensive	From 3,5 kg to 6 kg

COMPOSITION

Wheat bran, Flaked maize, Dried alfalfa, Flaked barley, Cane sugar molasses, Puffed barley, Rapeseed oil, Flaked peas, Dried beet pulp, Salt, Cooked extruded linseed, Di-calcium phosphate, Chicory pulp, Rice bran, Dried carrots, Clays, Calcium carbonate, Linseed oil, Fructo-oliogosaccharides, Glucosamine from fermentation, Chicory roots, Hydrolized marine collagen, Brewers yeast, Wheat germ.

TECHNICAL CHARACTERISTICS PER GROSS KG

Calcium
Phosphorus
Magnesium
Potassium
Digestible Nitrogen
Omega 3
Omega 6
Glucosamine1000 mg

AMINO ACIDS PER GROSS KG

ysine
Methionine + cystine
Methionine
Threonine
Tryptophan
.eucine
Arginine
soleucine4,4 g
/aline
Phenylalanine

GAMME PREMIUM

USI

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

Our recommendations:

- Distribute a minimum of 1.2 kg of hay per 100 kg of live weight for horses on straw bedding and 1.5 kg per 100 kg live weight for horses on shredded bedding.
- Leave a self-service salt stone and water at your disposal clean at will.
- Ideally, divide the ration into at least 3 balanced meals.

Supplement to forage for horses

ANALYSED CONSTITUENTS

Cobalt	
Selenium total	

OF FATIGUE

OPTIMAL FUNCTIONING OF THE DIGESTION

Glucosamine and hydrolized marine collagen support the natural repair of cartilage and help with joint lubrication. This compound aids suppleness and protects joints.

CONTROLLED STARCH

MAXIMUM MUSCULAR TONE

High quality proteins and selected essential amino acids for good muscular preparation.

HIGH CALORIFIC VALUE

A combination of effective and varied energy sources.

*Study presented at the BEVA Congress, the main European congress of equine veterinarians in Birmingham

** DOPING CONTROL PROCEDURE: Manufactured according to our quality control procedures, which include managing the risk of contamination of our feeds by natural substances that are prohibited under the rules covering equestrian sports.
