REGUL DIGEST

For digestive comfort

Use:

• Digestive support	Full ration
• Stress situations: Competition, transport	1 to 2kg or 2 to 4 litres per day Divided between all meals

Density = 500 g / L

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

We recommend a minimum ration of hay at a ratio of 1kg per 100kg live weight.

Thus, a daily ration of 5kg for a horse of 500kg.

REUL Digest should be fed in addition to forage.

Protects the lining of stomach and intestines

Special clays play a healing role in the digestive system.

Lengthens mealtimes

The long fibre strands take longer to chew and lengthen mealtimes.

Balancing the intestinal flora

Fructo-oligosaccharides and inuline stimulate the beneficial bacteria in the intestine and suppress those bacteria that are potentially harmful.

Improve the absorption of the feed

The introduction of live yeasts promote the digestion of fibre in the feed, stabilise the acidity of the large intestine and improve its function.

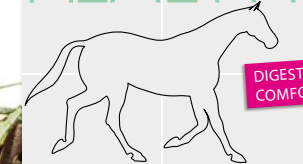

Regaining appetite

Digestive problems can cause a loss of appetite. The active ingredients in REGUL Digest help to stimulate the appetite.
