MASTER STALLION

For entire horses

Use:

| | Weight of horse | | | |
|-------------|----------------------|----------------------|----------------------|--------------------|
| | 450 kg | 500 kg | 550 kg | 600 kg |
| Medium work | 3.5 kg or ~ 6.5 L | 3.8 kg or ~ 7 L | 4.2 kg or ~ 7.5 L | 4.5 kg or ~ 8 L |
| Heavy work | 3.8 kg or ~ 7 L | 4.2 kg or ~ 7.5 L | 4.5 kg or ~ 8 L | 4.8 kg or ~ 9 L |

Density = 550 g / L

Master STALLION should be fed as a supplement to forage.

We recommend a minimum distribution of hay in the region of 1kg per 100kg live weight.

Thus a distribution of 5kg per day for a horse of 500kg.

Quantities should be adjusted according to the weight, body condition, age, level of activity, breed of the horse, taking into consideration the nature, quality and quantity of forage available.

Good body condition

Contains the active complex Regul Digest:

- **Maximises digestibility:** live yeasts improve the digestion of fibres.
- **Improves digestive hygiene:** fructo-oligosaccharides and chicory pulp preserve the balance of intestinal bacteria and prevent digestive problems.
- **Protects the gastric mucus:** special clays work as a dressing, protecting the gastro-intestinal mucus.

Maximum muscle tone

High quality proteins and selected amino acids for good muscle preparation.

Weight gain without excitability

Selected non-heating energy sources.

Reduces fatigue

Contains the Protek Health complex whose effectiveness is scientifically proven. This complex reinforces the anti-oxidant protection of horses. It reduces muscle fatigue and optimises performance.
