WIN'SOR PREMIUM

The power of a new generation of nutrition geared towards performance.

Use:

Density = 490 g / L

	Weight of horse			
	450 kg	500 kg	550 kg	600 kg
Light work	2.8 kg	3.2 kg	3.5 kg	3.9 kg
Average work	3.6 kg	4 kg	4.3 kg	4.7 kg
Intense work	4 kg	4.3 kg	4.7 kg	5 kg

Quantities should be adjusted taking into account the weight, body condition, age, activity level and breed of the horse, in addition to the type, quantity and quality of forage given.

WIN'SOR PREMIUM is used as a supplement to forage.

We advise to feed at least 1kg hay per 100 kg of the horse's body weight. For a 500 kg horse, this means a daily distribution of 5 kg of hay.
